

**What is end of life disposal of plastic waste?**

As per Rule 3 clause 'ga' (inserted 2022), "End of Life disposal" means using plastic waste for generation of energy subject to relevant guidelines in force which includes co-processing (e.g. In Cement, Steel or any other such industry) or waste to oil except in cases where feed stock chemicals are produced for further use in the production of plastic which may be then considered under recycling or for road construction as per the Indian Road Congress guidelines etc.
